MISSISSIPPI STATE DEPARTMENT OF HEALTH

## 2020 CERTIFICATION

## Consumer Confidence Report (CCR)

*Lincoln Rural Water Assn.*  
Public Water System Name

0430003 / 0430027 / 0430030 / 0430031 / 0430032  
List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community Public Water System (PWS) to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the PWS, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR.

## CCR DISTRIBUTION (Check all boxes that apply.)

| INDIRECT DELIVERY METHODS (Attach copy of publication, water bill or other)   | DATE ISSUED |
|---|-------------|
| <input type="checkbox"/> Advertisement in local paper (Attach copy of advertisement)  |             |
| <input type="checkbox"/> On water bills (Attach copy of bill)   |             |
| <input type="checkbox"/> Email message (Email the message to the address below)   |             |
| <input type="checkbox"/> Other _____  |             |
| DIRECT DELIVERY METHOD (Attach copy of publication, water bill or other)  | DATE ISSUED |
| <input type="checkbox"/> Distributed via U. S. Postal Mail  |             |
| <input type="checkbox"/> Distributed via E-Mail as a URL (Provide Direct URL): _____  |             |
| <input type="checkbox"/> Distributed via E-Mail as an attachment  |             |
| <input type="checkbox"/> Distributed via E-Mail as text within the body of email message  |             |
| <input type="checkbox"/> Published in local newspaper (attach copy of published CCR or proof of publication)  |             |
| <input checked="" type="checkbox"/> Posted in public places (attach list of locations) <i>Office</i>  |             |
| <input checked="" type="checkbox"/> Posted online at the following address (Provide Direct URL): <i>https://www.lincoln-rural-water.com/water-quality</i> |             |

## CERTIFICATION

I hereby certify that the CCR has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the PWS officials by the MSDH, Bureau of Public Water Supply.

## SUBMISSION OPTIONS (Select one method ONLY)

You must email, fax (not preferred), or mail a copy of the CCR and Certification to the MSDH.

Mail: (U.S. Postal Service)  
MSDH, Bureau of Public Water Supply  
P.O. Box 1700  
Jackson, MS 39215

Email: [water.reports@msdh.ms.gov](mailto:water.reports@msdh.ms.gov)

Fax: (601) 576-7800

(NOT PREFERRED)

**CCR DEADLINE TO MSDH & CUSTOMERS: BY JULY 1, 2021**

**ON TAP**  
**Lincoln Rural Water Association**  
**Old Red Star**  
**PWS ID# 430031**  
**June 10, 2021**

Lincoln Rural Water is pleased to present to you, this year's Annual Water Quality Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source consists of two wells pumping from the Miocene Aquifer. Lincoln Rural Water is pleased to report that our drinking water meets all federal and state requirements.

The following reports show our water quality and what it means. If you have any questions about this report or Concerning your water utility, please contact **our office at 1536 Monticello Street, Brookhaven, MS 39602, 601-833-6449**. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings, they are held on **the 3<sup>rd</sup> Tuesday of each month at the above location at 5:30 P.M. and our Annual Meeting is held on the 3rd Monday of March at the Lincoln Rural Water Office at 5:30 P.M.**

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identify potential sources of contamination. A report containing detail information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for Lincoln Rural Water have received a moderate and lower ranking in terms of susceptibility to contamination.

**Lincoln Rural Water Association** routinely monitors for constituents in your drinking water according to Federal And State laws. This table shows the results of our monitoring for the period of January 1<sup>st</sup> to December 31, **2020**. All drinking water, including bottled drinking water may be reasonably expected to contain at least a small amount of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

**Action Level** - The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

**Maximum Contaminant Level** - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

**Maximum Contaminant Level Goal** - The "Goal (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLG'S allow for a margin of safety.

**Addition information for Lead**

If present elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. ABC Water Association is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/sagewater/lead>. The Mississippi State Department of Health Laboratory offers lead testing for \$20.00 per sample. Please contact 601.576.7582 if you wish to have your water tested.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identify potential source of contamination. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request.
